Specifications

- EU Directive 2000/53/EC (ELV)
- EU Directive 2011/65/EU (RoHS2)

## Product Description

Grayline CX65-PVC is a non-toxic laboratory grade flexible PVC tubing designed for excellent resistance to many fluids, especially inorganic chemicals such as bleach, diluted sulfuric or nitric acid. The soft material is very flexible and ideal for installation over barbed fittings or around sharp radius curves.

Standard Packaging: Reels or Cut to Customer Specifications. Standard Color: Clear Other Colors and Custom Sizes Available Upon Request

| PROPERTY | TYPICAL VALUE | TEST METHOD |
| :--- | :---: | :---: |
| Durometer Hardness, Shore A (15 Seconds) | 65 | ASTM D2240 |
| Tensile Strength (psi) | 1,700 | ASTM D412 |
| Elongation (\%) | 375 | ASTM D412 |
| Specific Gravity | 1.17 | ASTM D792 |
| Brittleness Temperature, Pass ${ }^{\circ} \mathrm{C}$ | -40 | ASTM D746 |

The values listed in this bulletin, to the best of our knowledge, are accurate. They are typical performance results and are not intended to be used as design data. We disclaim all liability in connection with the use of information contained herein or otherwise. Working pressures and vacuum ratings are based on a combination of actual test data and derived values. Working pressures are calculated at 1:5 ratio of burst pressure determined per ASTM D1599. The selection of size and material for any particular application is the user's responsibility. The designer must consider many factors (e.g. temperature, fluid, connections, etc.) when specifying the tubing.
